

TARUNIKA K S

Computer Science and Design Student

Email: kstarunika1511@gmail.com | **Phone:** +91 8778434535 | **Location:** Chennai, Tamil Nadu
LinkedIn: linkedin.com/in/tarunika-k-s | **GitHub:** github.com/tarunikaks |

PROFILE

Motivated Computer Science and Design undergraduate with interests in Software Engineering, Artificial Intelligence, Cybersecurity, IoT, and Intelligent Systems. Experienced in developing robotics simulators and IoT-based applications through academic projects and hackathons. Certified through multiple Cisco Networking Academy programs and actively involved in leadership and professional development initiatives.

EDUCATION

B.E. Computer Science and Design
Easwari Engineering College (2024–2028)

TECHNICAL SKILLS

Programming: Python, Java, C, SQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming Systems (OOPS), DBMS, Operating Systems, Computer Networks

Frontend: HTML, CSS, JavaScript

IoT & Embedded Systems: ESP32, Arduino, Ultrasonic Sensors, IoT

AI & Emerging Technologies: Modern AI, Robotics Simulation, IoT Systems, Prompt Engineering

Tools: Git, GitHub, VS Code, Figma

CERTIFICATIONS

- AWS Cloud Quest: Cloud Practitioner
- AWS Cloud Quest: Generative AI Practitioner
- NPTEL (Introduction to IOT, Introduction to Industry 4.0 and IOT, BlockChain)
- MongoDB
- Introduction to Modern AI
- Security Alerts and Monitoring
- Cyber Threat Management
- Security and Connectivity
- Network Basics
- Introduction to Python

PROJECTS

Smart Parking System

A smart parking management system capable of real-time slot monitoring, QR-based authentication, automated billing, booking, and parking analytics.

Patent Filed: Indian Patent Application No.202641056865 A

Smart Food Freshness Detection System

An IoT-enabled food freshness monitoring solution that analyzes freshness levels, estimates shelf life, and provides real-time alerts to retailers and consumers.

Patent Filed: Indian Patent Application No. 202541119801 A

IntelliNav Robotics Simulator

Developed an intelligent robotics simulation platform featuring A* pathfinding, autonomous navigation, gesture-based control, human-aware obstacle avoidance, and real-time telemetry monitoring.

LEADERSHIP & CAMPUS INVOLVEMENT

Department Ambassador – Computer Science and Design Department

Represent the department and help lead the planning, coordination, and execution of technical events, workshops, seminars, and student engagement initiatives.

Cisco BOOST Program Participant

Participate in industry-led mentoring sessions, technical workshops, networking opportunities, and professional development activities.

ACHIEVEMENTS & HACKATHONS

- Participated in multiple 12-hour and 24-hour hackathons.
- Completed the Omnidimension Hackathon.
- Earned multiple Cisco Networking Academy certifications in Cybersecurity, Networking, AI, and Python.
- Built practical projects involving Robotics, IoT, Automation, and Intelligent Systems.

SOFT SKILLS

- Leadership
- Teamwork
- Communication
- Event Management
- Critical Thinking
- Problem Solving
- Adaptability
- Time Management
